## Project Planning Phase Project Planning Template (Product Backlog, Sprint Planning, Stories, Story points)

| Date          | 30 October 2022                   |
|---------------|-----------------------------------|
| Team ID       | PNT2022TMID39415                  |
| Project Name  | Real-Time Communication System    |
|               | Powered by AI for Specially Abled |
| Maximum Marks | 8 Marks                           |

## **Product Backlog, Sprint Schedule, and Estimation (4 marks)**

| Sprint   | Functional          | User Story | User Story / Task  | Story  | Priority | Team Members   |
|----------|---------------------|------------|--|--------|----------|--|
|          | Requirement (Epic)  | Number     |  | Points |          |  |
| Sprint-1 | Data Collection     | USN-1      | As a user, I can collect the dataset from various resources with different hand gestures.                    | 10     | Medium   | K Gajapathi<br>D Jayakumar<br>R Raghul Raj<br>N Shyam Ganesh |
| Sprint-1 | Data Pre-processing | USN-2      | As a user, I can load the dataset, handling the missing data, scaling and split data into train and test.    | 10     | Medium   | K Gajapathi  |
| Sprint-2 | Model Building      | USN-3      | As a user, I will get an application with ML model which provides high accuracy of recognized hand gestures. | 5      | High     | N Shyam Ganesh<br>D Jayakumar                                |
| Sprint-2 | Add CNN layers      | USN-4      | Creating the model and adding the input, hidden, and output layers to it.                                    | 5      | High     | K Gajapathi<br>D Jayakumar<br>R Raghul Raj<br>N Shyam Ganesh |

| Sprint   | Functional<br>Requirement (Epic) | User Story<br>Number | User Story / Task  | Story<br>Points | Priority | Team Members   |
|----------|----------------------------------|----------------------|--|-----------------|----------|--|
| Sprint-2 | Compiling the model              | USN-5                | With both the training data defined and model defined, it's time to configure the learning process.                      | 2               | Medium   | D Jayakumar<br>R Raghul Raj<br>N Shyam Ganesh                |
| Sprint-2 | Train & test the model           | USN-6                | As a user, let us train our model with our image dataset.  | 6               | Medium   | K Gajapathi<br>D Jayakumar                                   |
| Sprint-2 | Save the model                   | USN-7                | As a user, the model is saved & integrated with an android application or web application in order to predict something. | 2               | Low      | R Raghul Raj<br>N Shyam Ganesh                               |
| Sprint-3 | Building UI<br>Application       | USN-8                | As a user, I will upload the hand gestures image to the application by clicking a upload button.                         | 10              | High     | D Jayakumar<br>N Shyam Ganesh                                |
| Sprint-3 |                                  | USN-9                | As a user, I can know the details of the fundamental usage of the application.   | 5               | Low      | N Shyam Ganesh<br>K Gajapathi                                |
| Sprint-3 |                                  | USN-10               | As a user, I can see the predicted / recognized hand gestures in the application.  | 5               | Medium   | D Jayakumar<br>R Raghul Raj                                  |
| Sprint-4 | Train the model on IBM           | USN-11               | As a user, I train the model on IBM and integrate flask/Django/Anaconda with scoring endpoint.                           | 10              | High     | D Jayakumar<br>R Raghul Raj<br>K Gajapathi                   |
| Sprint-4 | Cloud Deployment                 | USN-12               | As a user, I can access the web application and make the use of the product from anywhere.                               | 10              | High     | K Gajapathi<br>D Jayakumar<br>R Raghul Raj<br>N Shyam Ganesh |
